

As a leading partner in industrial packaging, we strive not only to provide our customers with high-quality products, but also with sustainable and innovative solutions that contribute to a circular economy. Our mission is to work together with our customers and suppliers to build a future in which quality, safety, and respect for people and the environment are central.

Our strengths

- Customer focus and flexibility: customised solutions, fast delivery, and proactive service.
- Sustainability: promoting and offering the reuse, reconditioning, and recycling of packaging, with a focus on CO₂ reduction and circular processes.
- Innovation and expertise: continuous investment in knowledge, technology, and collaboration with leading partners.
- Safety and compliance: compliance with all legal requirements and international standards, including ISO 9001:2015.
- Efficient stock management: a well-designed and efficient inventory system enables us to supply customers flexibly. To achieve this, we rely on centrally located and well-equipped warehouses.
- Social responsibility: respect for employees, transparent communication, and ethical business practices.

Within the framework of the ISO 9001:2015 quality system, we ensure:

- Clear processes and efficient resources.
- Continuous training and involvement of employees.
- Regular evaluation and continuous improvement of our performance.
- Monitoring of customer satisfaction.
- Full integration of sustainability and safety into our business operations.

Management and all employees of Moens Verpakkingen are committed to putting these principles into practice every day and to working together towards a reliable, sustainable, and innovative future.

Rik Moens
